CELMAN THREATENED.

THE PRESIDENT OF ARGENTINA IN DANGER.

He Must Immediately Resign or Pay the Penalty With His Life.

A Reign of Terror on Among the Residents of Buenos Ayres-All Parties Armed.

Full Pardon Granted the Rank and File of the Revolutionists-More Trouble Almost Inevitable-Gold Now Quoted at \$4.80-The Situation Reviewed.

WEATHER BULLETIN.

SIGNAL OFFICE, WICHITA, Kan., July 50.—The highest temperature was 97 ° the lowest up to 7 p. m. 720, and the mean 84° with warmer, cloudless weather and gentle to fresh southerly winds.

Last year on July 30, the highest temperature was 83°, the lowest 55°, and the mean 70°, and two years ago the cor-

FRED L. JOHNSON, Observer. WAR DEPARTMENT, WASHINGTON, D. C., July 30, 8 p. m.-Forecast until 8 p. m Thursday:

For Missouri: Fair; southerly winds, stationary temperature. For Kansas and Colorado: Showers. northerly winds; cooler in Kansas; stationary temperature in Colorado.

NOT YET ENDED.

The Excitement in Argentina at Fever Heat.

LONDON, July 80 .- The Times corres-London, July 80.—The Times correspondent at Buenos Ayres says:
Every house was converted into a citadel yesterday evening. The people in the suburbs organized their own armed police to deal with the maranders. The union civica stated that they found boxes of ammunition in government stores empty instead of full as the store books indicated. This deception and terror in not cutting the rails and seizing the war minister when opportunity afforded caused the failure of the public cause. The exasperation against Celman is indescribable. Unless he resigns it is feared that attempts will be made upon his life. describable. Unless he resigns it is feared that attempts will be made upon his life. The settlement is postponed until August 2. Exchange shops quote gold at 480. If Celman has the slightest patriotism he will resign, but the sycophants around him have assumed a bullying tone and assert that he never will resign.

President Celman does not appear to realize his position. He has laughingly declared that only a military meeting could show the people how little he thought of resigning. It is reported that the squadron has surrendered. The payment of all bills has been deferred one month:

month.

The minister of war has issued a bulletin pardoning the rank and file of revolutionists and declaring that 200,000 national guards are ready to defend the country and President Celman, being now united with him by the tie of the battlefield. The bulletin is treated with derision and copies which have been scattered throughout the city are trampled under foot by the people. The outlook is bad unless Celman's declarations are mere bravalo.

Mr. Selby Carter, Nashville, Tenn: "Ayer's Sarsaparilla cleared my system of

AS WAS PREDICTED.

The Pew Building in Seneca, N. Y., Prove a Fire Trap.

SENECA FALLS, N. Y., July 30.—The in-evitable has occurred. The Pew building, against the erection of which three or four years ago such earnest protest was made, fulfilled its mission as a fire trap this morning and it is feared that it has also proven a death trap. A few minutes after to clock this morning the building, which is directly opposite Hoag's opera house in Fall street was discovered to be burn-ing, in Sutherland & Sons' restaurant. In ing, in Sutherland & Sons' restaurant. In a few minutes the entire structure was on fire. Had naught but the shell suffered there would have been triffling cause for regret, but at 7 o'clock the fairest commercial portion of the town was in ashes or in flames. The Pew building was approached from but one side and the atmosphere quickly became so bot that fremen could not endure it. The Phoenix block, including the electric light plant, the electric railway plant. tric light plant, the electric railway p the postolice, express office, the Re-printing establishment, the Courier, derson's furniture warerooms and Western I nion telegraph office, succumbed to the flames and within four hours fifteen stores to the east of the stone block were ruined. The flames sprang across the street to Hoag's opera house before an hour had passed and that was consumed with all of Fall street on that side east to the Sheldon block, while on the north side the Co-oper-ative block was the limit.

The sufferers, with some approximate losses on real property, are given below, there probably being a fair average insurance. The Phonix block, \$80,000; insurance: The Phomix block, \$80,000; electric light plant, \$80,000; door, \$80,000; dolinot wholly destroyed; Sylvester Pew, \$80,000; dolinson block, \$50,000; Howe block, \$12,000; Decky block, \$10,000; on Sheldon block, \$7,000, Hong hotel damaged probably \$15,000; Hong's opera house and block, \$40,000; Jamels block, \$15,000; the Mirror block, \$40,000; Crowell block, \$4,500; McCartins block, \$6,500; Miller block, \$2,000.

In State street the fire lapped

In State street the fire lapped up the Hudson house and black-mith shop, George's barber shop, harness store, the Norcott block, including Comb-r's liquor store, Hall's cigar factory, Hanna's second band. er's liquor store. Hall's cigar factory, Hanna's second hand store, a Chinese laundry. Demon's shoe shop, Kellogg's livery stable and the two rear houses next thereto, where the fire is limited. All three newspapers are burned out and the

An area of nearly three acres was burned over and many of the best business blocks in the village were wiped out. Careful estimated by insurance men and others place the loss at between \$600,000 and \$700. (eo, with insurance amounting only to \$100,000. The heaviest individual loss is that of the Thomas Houston Electric company, being \$100,000 with but \$10,000 insurance. Early in the morning Presi-Rumsey issued an order closing all the saloots in the village and they will remain closed till tomorrow morning.

PLACED AT \$1,000,000. AUBURN, N. Y., July 30 -A report received here places the Seneca Falls joss at \$1,000,000. Three acres were burned over

A Plan for a Temple to Be Built in Oregon-Notes.

The bright new paper of the order, The Oregon Gavel, reports the following: One of the greatest plans ever originated by the members of our noble order was the undertaking to build a magnificent temple. a home for all the lodges in Portland and a general headquarters for grand lodge officers. The ground has been bought, and it is a most desirable location, being on three newspapers are burned out and the telephone service suspended. The Western Union is doing business at the railroad station. The Gleason & Raily works were on fire several times, but the flames were kept down with but little injury. The fire was under control at 9 c clock this morning but soon broke out a new in Ledman & Gladiss' dry good store.

At area of nearly three accessive burners. the southwest corner of Second and Taylor are members of the order, have it so arranged that any brother can hold shares by paying only \$1 a month on each share. Any member of the order can take shares, this fine four-story structure is erected on one of the most prominent business corners of Portland we can point to it with pride and say, "Look at this living monument of one of the grandest orders on

> The total disbursements of the beneficiary fund of all the jurisdictions for the year 1889 make a grand total of \$4,153,768 -28. The total number of death losses dur ing the year was 2,049.

Illinois disbursed \$50,000 from the benefleiary fund during June, of which amount Billious complaints, constipation, and nausen, are relieved and cured by Ayer's cago.

charged with selling beer tickets at a pic-nic on the Fourth of July, was held yes-terday. The committee having charge of the trial found him guilty as charged and the four mouths of the year 1889 for which THE CURIOSITY SHOP.

The Varied and Beautiful Postage Stamp

and Cards of Many Nations. The original mania for collecting postage stamps has developed into a science dignified by the name of "philately." thusiastic philatelists and readers in gen-eral will be interested in the following facts gathered by an intelligent collector: A TRIED REMEDY FOR BILIOUSNESS.

Japan did not begin to use postage stamps till 1870, and already thousands of kinds have been designed and printed there. The envelopes are long and narrow, hand of the unruly organ so long as they to allow of the vertical writing, and are use such irrational remedies as blue pills, prettily ornamented with views or a pattern round the edge. It is rather disappointing to find that the charming dragon Stomach Bitters, they may expect relief Chinese stamps are said only to be used in with a certainty of obtaining it. The influence of the Bitters upon the great biliary eign residents. The first country that employed post cards was Austria, in 1869, and there are eight varieties, the notices being printed in different languages for the various provinces, whilst Hungary has separate stamps, envelopes and cards of its own. America distinguishes itself by its great number of kinds of stamped envelopes, past and present, of which there are 1,500 varieties, without counting shades. Russia is remarkable for the beauty of its stamps in color and execution.

The stamps of France are of great interest, owing to the historical events they in-dicate, beginning with the republic of 1849, camp kettle—any continuing through the empire, and again common pot or reverting to a republic in 1870, including kettle will answer. the head of Liberty, the head of Napoleon III, and a design to represent Peace and Commerce. The stamps of Canada are fine specimens of line engraving, and the early ones show beauty and variety of design, including portraits of the queen and Christopher Columbus, the latter also adorning the stamps of Chili. The early stamps of Greece are remarkably pretty in tints and ter condensed

The German stamps are effective and varied. Spain is to be noticed for having a stamp of the value of one-fortieth of a penny. The head of the 4-year-old King ceptacle, H. The Alfonso XIII has lately been placed upon the Spanish issues. India is fertile in varieties of stamps. English postage stamps are very numerous and varied in color. The first penny stamps were printed in black for two or three years, followed by the brick red that lasted till about ten years ago. Steel plates are used for printing the millions constantly issued from Somerset house.

Facts About Flags. 1. To "strike the flag" is to lower the national colors in token of submission.

2. Flags are used as the symbol of rank and command, the officers using them being called flag officers. Such flags are square, to distinguish them from other banners. 3. The "flag of truce" is a white flag, displayed to an enemy to indicate a desire for a parley or consultation. 4. The white flag is a sign of peace. After a battle parties from both sides often go out to the field to rescue the wounded or bury the dead under the protection of a white flag.

5. The red flag is a sign of defiance, and is often used by revolutionists. In our service it is a mark of danger, and shows a vessel to be receiving or discharging her powder, 6. The black flag is a sign of piracy. 7. The yellow flag shows a vessel to be in quarantine, or is the sign of a con-tagious disease. 8. A flag at half mast means mourning. Fishing and other vesvels return with a flag at half mast to announce the loss or death of some of them. 9. Dipping the flag is lowering it slightly and then hoteting it again to salute a vesse or fort. - 10. If the president of the United States goes afloat the American flag is carried in the bows of his barge or hoisted at the main of the vessel on board which he is.

Clover as Lucky Charm. Among the many superstitions connected with the four leaved clover is one that if a man loves a woman (or vice versa) and can obtain two four leaved clovers and induce her to eat one while he himself swallows the other mutual love is sure to result. Nay, according to a very good gypsy an-thority, even a trin patrini kas, or three leaved clover, will have this effect. Also take a four or three leaved clover, and making a hollow in the end or top of your Ipenstock or cane put the leaf therein, taking care not to injure it, and close the opening carefully. Then so long as you walk with it von will be less weary than if it were wanting and will enjoy luck in many ways.

A German proverb says of a lucky man: "Er hat ein vierblattriges Kleeblatt ge-funden"—"He has found a four leaved ever know a man who was ganz und gar. For if you did be sure there was nothing

Longfellow's Ancestry,

The ancestry of Henry W. Longfellow, the poet, is traced by The Inter-Ocean from that John Alden who came over in the Mayflower after this fashion: John Alden married Priscilla Mullens (other wise spelled Molines and Moleyns); their daughter married William Peabody, whose daughter Ruth married Benjamin Bartlett, whose daughter Priscilla married John Sampson, whose daughter Susanna married Deacon Peleg Wadsworth, whose son, Gen. Peleg, was Longfellow's grandfather. The first American Longfellow was William Longfellow, of Newbury, Mass., who came to this country from Yorkshire, England about the year 1651. The poet was of the fifth generation in descent fr this man. The makien name of the mother of the poet was Wadsworth; she was the granddaughter of Gen. Peleg Wadsworth,

One of England's Eminent Men. The 15th of July, 1800, was the eighty third birthday of Cardinal Manning, who has been so prominently before the public, more especially of late years. Yet his sotivity, both physical and mental, appears to be as great now as when he was first installed archbishop of Westminster. His daily routine is the same as that of men not half his years. He rises at 7, says mass at 5, breakfasts at 8:45, spends his mornings in hearing confessions or receiving visitors, dines at 1:30, drives to some mission requiring his presence or to some place where he has business, takes tea at 7, and retires to carry on his vast corre spondence, interrupted by the duties of the day, until 11:89, when he seeks well earned repose. The greater part of his correspondence he answers himself, sometimes the most trivial matters.

Chosen Friends.

Indiana and Texas are close together in the race for membership, and Michigan and Pennsylvania are also now having a very interesting little gallop for the lead. Supreme Marshal J. P. Van Nest, of Wooder, O., is doing yeoman service in the Onio jurisdiction. He will muster 5,500 at Chosen Friends roll call before the end of the year.

Supreme Medical Examiner Jameson, of Indianapolis, Ind., reports for the month of April, 1830, as follows: Number of peti-tions received, 609; approved, 460; reduced and approved, 42; returned for correction, 33; rejected, 6; held, 9. Tetal, 609.

Had Never Disappointed Her,

"I believe in men thinking of their wives and trying to oblige them," said the man who had treated last, larly says to me, 'I'd stay out half the night if I were you.'"

"Wellf SCIENCE AND PROGRESS.

TOPICS OF INTEREST TO PROGRES-

SIVE MEN AND WOMEN. Simple Still for Procuring Pure Water for Drinking Use in Localities Where

the Natural Water Is Alkaline or The simple water still shown in the accompanying cut was devised by Dr. E. Cutter, and illustrated and described orig-

nally in Popular Science News: (A) Does away with the worm. (B) With the condensing water. (D) A reservoir of tinned iron, 18x9 inches, with tight top, which fits into a kettle. At the bottom is soldered a flange of tin flaring up-ward. At B is a tube to lead off the water that condenses inside and runs down the sides. The drops of distilled water are scrated during their fall through the air

to receptacle, and becomes palatable.

The cut here given shows a section of the

apparatus. A B B is a tin cylinder 9 inches in diameter and 18 ered with a conical is a flange to fit as seen in any cover to a dinner pot. CCisanother flange like FF, turned upside down so that wa-

YATER the inside-A B B water bad as is may be in the SIMPLE WATER STILL

)E

camp kettle D. Set en stove, range or fire, so that when A B B is put on the kettle the tube B G may come over the receptacle H. Then have a gentle fire so that steam will not issue from G. Pure distilled water will soon drip from G. The new points of this apparatus are

briefly summarized as follows 1. It does away with a worm and cold water for condenser. It is found that there is a current of air from all sides cool-ing the condenser, A B B, enough to give with this apparatus five pints in ten hours. 2. The distilled water of the chemist is brackish, due to the distillate being discharged in comparatively closed vessels. In the present case the water in drops falls through the air, and this presents a large surface to the atmosphere, with the practical result of an aerated water like that of a spring.

The material should be tinned fronnot zinc, which distills zinc oxide or may be of enameled ware, glass, porcelain,

crockery, clay, pottery, etc.

4. Variations—Take adinner pot, remove cover to it, and fit a tin cylinder to cover eighteen inches long. At the other end put flanges and tube as above, and this will also do the work. The apparatus may be made collapsible like the collapsible drinking cup. Liquids of a less botling point than water can also be distilled with this device, for example alcohol.

A Cheap Elevator for Private Houses. From Berlin comes news of the invention of a simple elevator that can be inexpensively supplied in private dwelling houses. It is described as a chair run somewhat on the principle of the inclined rallway, up and down on one half of the ordinary stairway, leaving space for any one who wishes to walk instead of riding Each flight of stairs in a house has its separate chair, and the motor is power furnished from the city water in the cellar. The chair is set in motion by a simple pressure of one of its arms, while after it as been used it slides back to the bottom step, its descent being regulated in such a manner that the carrying of passengers is a matter of entire safety. The motive according to the cost of water, this being it is stated, at Berlin at the rate of a little more than one-tenth of a cent for each trip

Europe's Venerable Tree.

There is not in Europe a more interest clover." On this test Dr. Wilhelm Korte preaches the following homily: "This is, you say, a 'stupid superstition." Did you seum of Paris, the portrait of when the present and Gorden. here reproduced from Forest and Garden utterly and entirely, devoid of superstition? slong with the following interesting facts regarding it:

The first of its race to grow in the soil of Europe, it has survived for more than two centuries and a half the wars of the ele-ments and the social cyclones which have swept over it. The seed from which it sprung was planted in 1635 by Vespacian

THE OLDEST TREE IN EUROPE. Robin, gardener of Louis XII, in the Jardin du Rot, now called the Jardin des

Vespscian Robin was the son of a gardener more famous than himself, Jean Robin, who had charge of the reyal garfor the elder Robin that Linnsens, more than a century after his death, named the genus Robinia, to which our locust tree beongs. Little is left of the old tree but the shell of the trunk and a few feeble branches which clothe themselves year after year with leaves and flowers, testify ing to the wonderful vitality of the locust tree, and to the care which has been be stowed upon this specimen by the authori ties of the garden, the most interesting in the world, perhaps, in its historical assoclations with men famous in the annals of botany.

"I have to work like a beaver in sum-

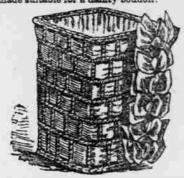

"Beavers don't have to work very hard in summer. The straw hat has the biggest contract."—Harper's Basar.

A resident of Little York, Cortlandt county, N. Y., who had been greatly annoyed by mysterious neises, pulled off ome ciapboards near the eaves of his house the other day, when he found a colony of 107 bats. He buried them in the garden and now aleeps undisturbed.

This, according to an amateur artist, is very easy work. Several candles can be painted at a time. Enamel paints are used. A tile palette and small pads of cotton wool are needed. Floral designs are best. Sometimes a few inches of caudie are colored brown, blue, or red; then with the cotton wool, tied in a place of muslin, bring the color up the candle till it merges in the white; then paint one bloom. If you have many candles paint a different shade on each; it is easily done, every touch of the brush effecting a definite result—the bolder the design the better. The effect of a ribbon wound round the candle is produced by twisting an inch wide strip of paper about it and coloring all that remains of the candle. When the paper is taken away the candle can be left as it is, or on the color small white flowers or patterns may be painted. It is fastinating work, for no preparation is necessary and a few ouches make a great effect.

Trimmed Wicker Work

Articles of wicker work, such as light chairs, baskets, etc., are particularly pretty when trimmed up with ribbons. Our cut shows an attractive waste paper basks made suitable for a dainty boudoir

WASTE PAPER BASERT FOR BOUDOIR. It is of wicker work, decorated with rows of garnet satin ribbon threaded in and out and knotted at the side in jaunty butterfly bows, and lined with old gold satur.

Fruit juices make delicious drinks to refresh and invigerate het and tired humanity at this season. Some tempting recipes are as follows:

Cherry Sirup.-Select fine ripe cherries mash them well, then press out the juice through a sieve, add a little water and let them come to a boil. Strain, add sugar sirup and a little-lemon juice. When cool pour in glasses over oracked ice. Raspberry Vinegar.—Mash four pounds of

ripe raspbarries to a pulp, add three quarts of cider vinegar, let it stand four days, strain off the juice and add four pounds more of fresh fruit. Repeat this process again in three days; then to each pound of liquor allow one pound of best white sugar, bottle it, and let it stand one week, then cork tight and keep in a cool place. Dilute with water for use.

BerryLemonade.—Juice of balf a lemon, one and one-balf tablespoonfuls white sugar, two or three slices of orange. Fill a tumbler half full of shaved ice, add water, shake well, and ornament with ber-

How to Serve Wine.

Wine is like a delicate flower, and should be treated as carefully; otherwise, as a lily touched by frost, it will droop and its full life and beauty never return. Champagne life and beauty never roturn. Champagne should be chilled but once, and then only fifteen or twenty minutes before It is used, says one authority on scientific wine drinking, and claret should be gradually warmed and drank at a temperature of 70 or 75 degs., and never drank at all excepting with meats. It is a common thing to selladies add ice and sugar to claret. The might as well add sugar to vinegar or re sort to their usual relish-pickles-for claret with ice added becomes nothing more or less than vinegar.

The old custom of serving many wines at banquets has sensibly been done away with. Now one sees only Sauterne with the oysters, sherry or Madeira with the soup, Burgundy or claret with the meate and entree, these grosser wines preparing the palate for the most delicate of all wines -champagne.

ALL AROUND THE HOUSE.

The Light and Delicate Menn That Alone Is Tempting in Summer's Hent. The dinner in summer should be a much lighter, more dainty meal than in winter. Let the cloth be pure white damaek, with little color displayed in the decorations except that of flowers. Little Neck clams are particularly nice to introduce the soup, which should be a clear consomme or deli-cate cream soup. Mulligatawny is an In-dian soup which belongs to summer, and is properly served with a chicken or game dinner. Most varieties of fish are only in season in summer. Heavy, hot roasts of beef or mutton may often be discarded on a warm summer's day for broiled lamb chops served with maitre d'hotel butter. or for fried chicken or brotled cutlets, or for a delicately crisp roast of spring lamb

Curries belong to summer, and they offer an agreeable change to the appetite which has become jaded by a monotonous winter diet. Chicken and veal are the most suit able meats for a oursy, but lamb and some varieties of fish are also delicious prepared in this way. Frienesces of lamb, chicken and veal are always welcome summer

Wiss gardeners arrange the sowing of their crops so that there is a continuous supply of fresh, tender green peas and corn and other choice vegetables from the first picking till the frost appears. It is a little more difficult to insure tender salad greens. Nothing grown for this purpose in the heat of midsummer is ever so order and dell-cions as the lettuce and other plants that spring out of the cool carth in early spring.
Light batter puddings are almost the
only hot pudding suitable for warm weather. The variety of cold custards, foed desserts and creams is so large that there is no excuse for greasy rich ples and puddings. Good househeapers need not be reminded, says The Tesoune, which furnishes the foregoing tempting suggestions, that perfectly ripe fruit is to be served in perfection ice cold, but never iced.

Semolina Cream

Sonk one ounce of semolina in one gill of sold milk for an hour, boil it until soft in half a pint of milk. Dissolve half an ounce of gelantine, previously scaked in half a gill of water, in half a pint of boiling milk, aweeten it with two ounces of lump augar. flavor to taste, and when the cream is be ginning to set put it into a mold

Pretty Photograph Frames.

"Pretty photograph frames that resem ble small over-mantels, and hold four or eight pictures, can be made of white wood Along the top is a gilt rod, and on it are hung little red, yellow or peacock colored silk curtains, intended to draw, if one wishes across the whole row."

Grass stain is particularly obstinate to remove. It will sometimes disappear by dipping the spot in molasses and letting it Cervantes talls us of a brown-this had contained to protect his had

lie a few moments. Rinse the molasses out in clear water, and the stain will disappear with it. A more effectual method, however, is to dip the spot in a solution of tin chloride and immediately wash it out in abundance of clear water. Many stains which are too firmly set to vield to the treatment with boiling water will come out by dipping the spot in warm chlorine water.—Christian Intelligencer.

The Spanish chestnut makes a handsome, symmetrical tree. Orchard and Garden recommends it as very desirable for planting along the roadside, where it will not only furnish as good shade as the maple, but produce a good crop of nuts and timber of much more value for posts, rails, etc. The American chestnut makes the largest and talkest tree and is much the hardest. The European forms a tree much shorter and with a round head, somewhat

similar to the Norway maple. The Sexennial League Thirty lodges have been instituted in sixty days, with 8,000 members.
